Professional Summary

Junior Frontend Developer working with JavaScript, TypeScript, and React. Led Tasteorama, a team learning project, and implemented recipe filters, favorites UI, and API integration. Currently collaborating with QA, a project manager, a designer, and a backend developer on Beauty Studio, a project in development.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: React, Next.js, Redux Toolkit, React Router, Vite, responsive design

Backend: Node.js, Express, MongoDB, Mongoose, REST APIs

Testing and tools: Playwright, Node.js Test Runner, ESLint, Git, GitHub, Vercel

Project Experience

Tasteorama | Team Lead and Developer | Team learning project

React, Redux Toolkit, React Router, Node.js, Express, MongoDB

- Coordinated team development and integrated teammates' changes through GitHub pull requests.
- Implemented category and ingredient filters, mobile filter controls, and favorites UI; connected recipe requests to the deployed REST API.
- Refined responsive filter and recipe layouts and integrated loading states into the recipe list.

You My Heart | Personal project

React, JavaScript, TypeScript, Canvas API, Vite

- Built an interactive story with Canvas animations, audio controls, a responsive photo gallery, and a lightbox with mouse and touch interactions.
- Separated reusable UI components and hooks into TypeScript modules; used WebP photos, asset preloading, and ESLint and TypeScript checks.

Demo: gift-chi-five.vercel.app | Code: github.com/Slavik756/gift

PowerGym | Personal portfolio project

HTML, CSS, JavaScript, Vite, Playwright

- Built a three-page fitness demo with class filters, booking validation, confirmation, cancellation, and persistence in browser storage.
- Organized shared UI and booking logic into modules; added Node.js unit tests and Playwright checks for booking, navigation, and responsive layouts.
